On the Setup (PTS) page set a **serial number** for the technical specifications and a **default template** based on which the attributes on the technical specifications card will be inherited.

From **Attribute Groups** you can enter a list of Groups that will contain all the attributes (e.g., specifications) for the items. The groups allow you to categorize the characteristics.

In each group we insert the technical specifications creating an ordered list of **Attributes**, for example the nutritional information usually found on food packaging.
